Dear Dan:

Shippers and Carriers are always talking about partnerships and the need to work together to provide the level of service that is required for a particular book of business. I have these types of discussions daily with carriers, big and small, from all parts of the country, and very seldom is “the talk” backed-up by “the actions” that provide mutually beneficial business opportunities for all the parties involved.

However, without reservation I can say that Unyson Logistics has such a relationship with Stryder Motorfreight, as our teams work very closely together in a true partnership environment, to provide World Class Service to Western Container, to successfully meet the stringent service demands that exist with this customer. Stryder Motorfreight has consistently delivered 5000+ annual loads at 100% on-time delivery, in very dynamic short haul lanes, as well as lanes that cross over the Canadian border during harsh winter weather conditions that frequently generate road closures and treacherous driving conditions. But in spite these difficult environments, Stryder Motorfreight still achieves 100% on-time delivery service!

We are proud to work with a carrier that values relationships and understands on-time service demands, as without your company, and the “culture” you have created in all your employees, we could not achieve the level of success that we mutually enjoy. Thank you “for all you do” for Unyson Logistics and Western Container!

Sincerely,

Michael J. Noelker  
Sr. Director, Logistics Operations  
Unyson Logistics
